Summary

Manos is a mathematician researcher that specializes in designing algorithms related to Computational Geometry and Computer Graphics. He got his PhD in applied mathematics from University of Crete (UoC), where he studied the Voronoi Diagrams of 3D spheres. He holds a M.Sc. (Honors) in mathematics, as well as 2 bachelor degrees, both in pure and applied mathematics.

Since July 2019, he is a member of Foundation for Research and Technology Hellas - Institute of Computer Science (FORTH-ICS) spinoff startup ORamaVR. As a research director, he oversees the design of innovative, geometric-based algorithms, suitable for Augmented, Virtual and Mixed Reality. He is the deputy PI of several EU Projects regarding advanced medical HCI applications in 5G edge cloud computing environments. His papers related to Geometric Algebra, “Never Drop the ball” and “GA-Unity”, have received the Best Paper & Presentation Award from the CGI Conference (ENGAGE Workshop, 2021 and 2024). He co-authored “pyGANDALF”, which received the Best Education Paper award at SIGGRAPH ASIA 2024.

Manos is currently a visiting collaborator of FORTH-ICS and specifically the Human-Computer Interaction Lab. Since September 2022, he is also an adjunct professor at Computer Science Department at UoC. From September 2024 until February 2026, he was an adjunct professor at School of Electrical & Computer Engineering at Technical University of Crete. Previously, from July 2019 until July 2022, he was a post-doctoral researcher in the Department of Mathematics, UoC, working on logic & diophantine problems.
